DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1,

The species are as follows:

- 1) *Specific lipid conjugate;*
- 2) *Specific lipid conjugate solvent;*
- 3) *Specific nicotinic compound;*
- 4) *Specific alcohol*

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

1. The claims are deemed to correspond to the species listed above in the following manner:

- 1) Specific lipid conjugate, with claims 13-17, 23, 33 and 36 reading upon this species;*
- 2) Specific lipid conjugate solvent, with claims 21-25, and 33-36 reading upon this species;*
- 3) Specific nicotinic compound, with claims 26-27 reading upon this species; and*
- 4) Specific alcohol with claims 28-31, 33 and 36 reading upon this species.*

The following claim(s) are generic: Claims 13, 18, 19, 24, 27, 28, and 32.

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

- a) each lipid conjugate species is a distinct lipid conjugate which lacks a special technical feature in view of US Patent 6022561 (page 1, abstract, line 1);
- b) each lipid conjugate solvent species is a distinct lipid conjugate solvent which lacks a special technical feature in view of US Patent 3645390 (page 1, abstract, line 3);
- c) each nicotinic compound species is a distinct nicotinic compound which lacks a special technical feature in view of US Patent 3890333 (page 1, abstract, line 2); and
- d) each alcohol species is a distinct alcohol which lacks a special technical feature in view of US Patent 3642549 (page 1, abstract, line 3).

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
